Fix the joists to the ground with expansion screws, the joist spacing should not exceed 350 mm. Double joists are needed at the end-to-end joint between decking boards.

Install the start clip and slide the first decking board into the start clip.

Slide the clips into the groove of the decking boards, secure the clip with screws.

Push the next board into the clips.

Reserve a proper gap at the butt of the two boards for contraction and expansion. Along the edge, toenail screw to secure the decking boards.

Trim the L corner at a suitable angle and fix with screw. The spacing of the screws should be no more than 500mm.
